1. Claims 1-27 are allowed.

## **REASONS FOR ALLOWANCE/EXAMINER'S COMMENTS**

### **Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance: none of the prior art either alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103. Specifically, in reference to independent claim 1 (and its dependents), none of the prior art either alone or in combination disclose or teach of the claimed apparatus for the self-measurement of intraocular pressure by a user having a test eye and an observing eye specifically including as the distinguishing features in combination with the other limitations the claimed "adjustment mechanism in communication with the tonometer for positioning the tonometer tip in contact with the test eye and a display in communication with the receiver and oriented toward the user for displaying the applanation pattern to the observing eye".

Regarding independent claim 10 (and its dependents), none of the prior art either alone or in combination disclose or teach of the claimed hand-held apparatus for the self-measurement of intraocular pressure by a user having a test eye and an observation eye specifically including, as the distinguishing features in combination with the other limitations the claimed "housing having a first ocular portion and a second ocular portion on one side thereof; an adjustment mechanism in communication with the tonometer for positioning the tonometer tip in contact with the test eye; and a display

disposed in the second ocular portion and in communication with the receiver for displaying the applanation pattern to the observing eye".

Regarding independent claim 20 (and its dependents), none of the prior art either alone or in combination disclose or teach of the claimed method for the self-measurement of intraocular pressure by a user specifically including, as the distinguishing features in combination with the other limitations the claimed "placing a test eye and an observing eye of the user adjacent to the housing; positioning the tonometer tip in contact with the test eye and determining the intraocular pressure of the test eye based on the force applied by the tonometer tip upon observation of a selected applanation pattern by the observing eye".

#### Examiner's Comments

Upon further search and consideration of applicants arguments the rejection of claims 1, 2, 7-11 ,14 ,17-20, and 22-27 by Luce have been withdrawn and a reasons for allowance has been set forth above. Furthermore, the rejection of claims 4-6 by Luce in view of Davidson has been withdrawn since claims 4-6 depend from allowable independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES C. JONES whose telephone number is
